eCopy IT Department Training

Overview

This one-day Professional Services offering provides the customer IT department with a thorough overview of their eCopy products. Emphasis is placed on totally integrating eCopy with their corporate infrastructure and applications.

Prerequisites

eCopy products must be installed and functional in the customer environment.

Detailed Course Description

During the on-site visit, the eCopy consultant reviews existing installations and demonstrates several advanced features and functions. The eCopy consultant typically works with the customer IT department to produce an installation template/checklist for future installations. The eCopy consultant also demonstrates enterprise application management (MSI rollout, publishing) and eCopy Desktop.

Availability

Available as one day of PSO
