

Rapidly develop custom document imaging solutions on the device independent eCopy ShareScan platform

eCopy™ ShareScan® SDK

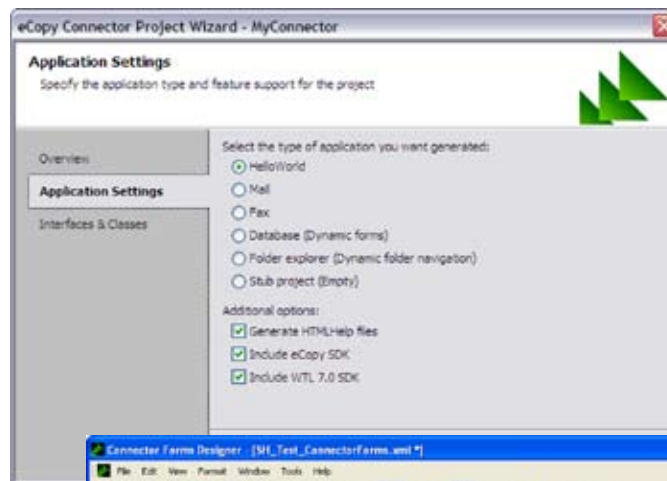

eCopy Connectors provide a simple and secure way for any office worker to use their copier to get paper based information into your software application. With the help of the eCopy ShareScan Software Development Kit (SDK), your solution will work in as little as 1-3 man months on virtually all copier platforms without the need to write and test separate applications for each copier brand and family of devices.

Build custom “scan to” Connectors to scan paper documents from any eCopy-enabled copier or scanner to your enterprise applications

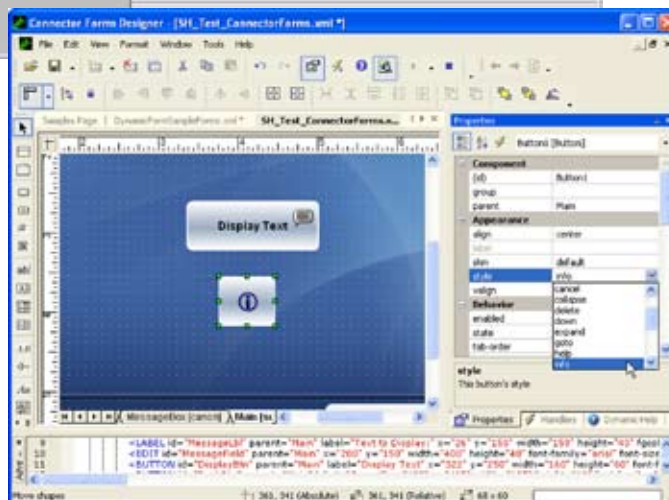

Easy to Use

Using the eCopy ShareScan SDK requires no knowledge of scanning, hardware, or image processing. The Connector Wizard generates six different samples with all the necessary images, data, and help files, as well as basic functionality. You only need to provide:

- Administration/set-up with the application from the Connector
- Communication between the client user and the application
- Storage or distribution of the document with the application

The SDK includes a Microsoft Visual C++ Connector Wizard that creates the basic Connector framework and administration console interface (an ActiveX control).

The SDK also includes a Visual Forms Designer for developing the client interface for all eCopy supported platforms.

Feature	Benefit
Configurable, custom button on eCopy touch screen	<ul style="list-style-type: none"> • Requires no knowledge of scanning hardware or image processing • Connector Wizard generates samples with all the necessary images, data, and help files, as well as basic functionality
Flexible user interface	<ul style="list-style-type: none"> • Drop-down lists, soft keyboard input, system generated fields, etc., enable for easy input of additional document related information/metadata
eCopy ShareScan framework	Provides: <ul style="list-style-type: none"> • Scanning and file creation (PDF, PDF/A, TIFF, JPG, CPY) • Administration for managing the Connector • Connectors developed without a copier or scanner
eCopy ShareScan Services	<ul style="list-style-type: none"> • File Services (Encryption, Security, Text Search, File Format, Document Name, Blank Page Removal, Bates Numbering, Batching, Document Tracking) • Cost Recover Service • ID Services • Document Services (Image Services (De-speckle, De-skew, page removal, blank page separation) and Data Publishing Services (barcode processing, zonal OCR, forms recognition, data extraction)
Device independent	<ul style="list-style-type: none"> • Compatible with all eCopy-enabled copiers and scanners
Industry standard Windows-based toolkit (C++, COM)	<ul style="list-style-type: none"> • Ease of integration • No additional scanning SDK required • Reduced development time
Visual Forms Designer	<ul style="list-style-type: none"> • Graphical user interface development tool • Supports multiple client formats and generates the forms (XML)
Connector Wizard	<ul style="list-style-type: none"> • Enables developers to build one Connector to run on multiple devices

Product detail

The eCopy ShareScan SDK provides a wealth of tools to get your Connector up and running in weeks rather than months. The product includes:

- Visual C++ .NET Connector Wizard, that generates a functional Connector framework
- Visual Forms Designer, a graphical user interface development tool which supports multiple client formats and generates the forms (XML)
- Samples and documentation
 - Includes Getting Started Guide, UI Style Guide, and Online Help Reference

- Six Connector Samples: Mail, Fax, Database, Folder Explorer, HelloWorld, and Stub (for advanced users)

- eCopy ShareScan core components, including:
 - eCopy ShareScan Services Manager
 - eCopy ShareScan Administration Console
 - Windows client for simulation of embedded and eCopy ScanStation interfaces
- SDK program members have access to the SDK Web site which contains additional SDK tools and information 24 hours a day, 7 days a week
